The natural water of Mt.Fuji is
"water" which has unlimited possibilities.

WHISKY THE FUJISAN is made with natural spring water
which is come from a forest area of Mt.Fuji.
The forest area is located 1000m above sea level.
It takes ages to become the spring water filtered
by the 160m of basalt rock layer under the forest.
When the stars shine in the night sky and the moon smiles,
please enjoy the story of yourself only with
Whisky the Fujisan which is rich in taste.
